Subject                    Transparency of capacity calculation

Dear Co-Chairs,

As already discussed in the last meeting of SG1 (10 February 2016) the MPP has still concerns regarding the transparency of capacity calculation and allocation. This subject was also discussed in the last Flow Based Consultative Group, but with limited results. To bring the discussions on this subject further we would like to share the attached note with the Support Group. The notes describes the relevant legal environment regarding the publication of information the market needs to be efficient. Obviously we are happy to give further explanation.

Yours Sincerely,

Ruud Otter

Chairman Markets Parties Platform
