Subject Contribution to the discussion on price zone delimitation

Dear Mr. Gence-Creux,

ACER recently consulted on delimitation on price zones. The input of the Market Parties Platform for that consultation has been consolidated in the Eurelectric response. However, in parallel we have worked on a more detailed input to the discussion and commissioned a study to Frontier and Consentec in order to help us to find the parameters that are influenced by price zone delimitation or that influence price zone delimitation.

The result is the report that is attached to this letter. In our view this gives comprehensive overview of the factors involved and that should be taken into consideration when assessing price zone delimitation. The core of the discussion should be the aim for maximum market efficiency over all timeframes.

Obviously we would be very happy to discuss this further with you.

Yours Sincerely,

Ruud Otter

Chairman Market Parties Platform
